

# Revolving Door ASSA ABLOY RD100

ASSA ABLOY

ASSA ABLOY Entrance Systems

The global leader in  
door opening solutions

Moving beyond the manual door

# Moving beyond the manual door

The ASSA ABLOY RD100 revolving door provides a premiere option for customers with pedestrian traffic who want a compact, low-energy revolving door without compromising on quality. Equipped with features that benefit both users and business owners, it is an ideal choice for even pedestrian flow. In order to get things turning, all this door needs is a little push.

## Taking convenience and sustainability further

Equipped with “Return-to-Home” as standard, the ASSA ABLOY RD3-100 and ASSA ABLOY RD4-100 will safely return the door leaves to the optimum home position to minimize air permeability and maximize thermal efficiency. Regular maintenance can further increase saving potential and prolong the equipment’s service life.

# Smart Assist goes with your flow

Do you have a public or private office with purely pedestrian traffic? Then you want your clients to come in relaxed and comfortable. The ASSA ABLOY RD100 does just that by giving its users a bit more control with manual initiation.

To start this door, all it needs is a gentle push. The door then adapts to that push and operates at the pedestrian's speed, always stopping in the preferred position to welcome the next user and maintain a comfortable indoor climate. Braking capabilities, responsive door leaves and intuitive Return-to-Home position increase sustainability and enhances safety for users.

## Features and options:

- Smart Assist: minimum effort for maximum operation
- Speed Control: regulates door speed
- Return-to-home position: ensures safety and climate control

## Design

ASSA ABLOY RD100 can be designed and ordered in three and four wing configurations to suit your needs. Our revolving door systems are offered in anodized aluminum, powder coat, or stainless steel-clad.

Together with the addition of smart brushed stainless steel handles from our standard range, or tailored designer handles to match the rest of a project, the wide range of design options enables the designer to create a truly signature entrance.

The doors are designed so that they can be placed and fixed directly onto an existing finished floor surface. No special foundations are required. For new construction and replacement, a ground ring is available as an option.

ASSA ABLOY Entrance Systems is a leading supplier of entrance automation solutions for efficient flow of goods and people. Building on the long-term success of the Besam, Albany and Megadoor brands, we offer our solutions under the ASSA ABLOY brand. Our products and services are dedicated to satisfying end-user needs for safe, secure, convenient and sustainable operations. ASSA ABLOY Entrance Systems is a division within ASSA ABLOY.
