Light duty doors for budget sensitive projects

The 1" ASSA ABLOY AU3040 is perfect for those projects where the budget is top priority, but a polyurethane-insulated door is still a requirement. With an R-Value of 10.1, these doors are economical, energy efficient and well-suited for vertical dock doors or a variety of light-duty applications.

- R-Value: 10.1
- 1" thick
- Triple layer construction with CFC-free polyurethane insulation for excellent energy efficiency
- Ribbed steel front panels lend strength to the light duty design.
- 20-gauge interior backer plates ensure hinges are well anchored for structural integrity.
- Available in four colors to compliment most building designs
- Wind load available
- Available with Rapid Install VL
- 10-Year Warranty*
